PROFESSIONAL STATEMENT

I am a full-stack developer with 11+ years of experience in Java and JavaScript technologies.

WORK EXPERIENCE

Allianz Technology

2014 to Present

Started as a Senior software engineer in 2014, now I perform the duties of a Technical Lead. A typical working day consist of attending client meetings, conducting code and design reviews and involving development activities of any on going projects.

During my tenure with Allianz, I have worked in various client facing applications mainly targeted on insurance domain. I was part of a team which did tasks like

- Rebuild legacy software systems using the latest Java frameworks such as Spring boot, Hibernate, and Angular
- Integrate the existing Allianz insurance platform with third-party Insurance broking systems, like that of E-bix, SVU, etc.
- Setup and manage Continuous Integration environments for deploying and testing applications internally using tools like HyperV, Atlassian Bamboo, and IBM UCD

SunTec Business Solutions

2011 to 2014

During my years with SunTec I was responsible for the development of various Industry-standard solutions within banking financial services and insurance domain. Also, I was the part of the elite team of developers which developed a business rules engine on top of Java virtual machine that is still used by many customers to this date.

EDUCATION

Bacheler of Technology : Computer Science and Engineering

2006 to 2010,
Musaliar College of Engineering and Technology,
Mahatma Gandhi University
